**Subject: Aspinook Pond Drawdown**

Aspinook Hydro, LLC owns and operates the Wyre Wynd hydroelectric Project on the Quinebaug River in Jewett City. The dam forms Aspinook Pond which borders your property.

As part of normal maintenance of the dam we need to lower the water level to make repairs to the dam. Here's a summary:

**How much will the water level be lowered?**

**About 30 inches lower in elevation than the present level.**

**When will it happen?**

**Approximately or soon after Monday, September 10, 2018.**

**How long will water level be down?**

**About 1 week.**

Please realize that the water level in your well may temporarily drop. Also please realize that the drawdown may be delayed due to weather or other conditions.

We appreciate your cooperation as we continue with our goals of maintaining a safe facility that provides recreational benefits and clean, renewable electricity.

Please call or email me if you have any questions.
