This is ridiculous. I’ve been working full time and teaching both my girls for the last 7 weeks thanks to the covid 19. Our school needs this money to help our children catch up and continue to thrive in this crazy world. This is our job as citizens to make sure our children are educated properly for one day them to run our towns and government. I’m very upset you would take 1 million from their school budget which was already low to begin with. If you haven’t seen the hardship of distance learning you should realizes our school needs money to help educate in school and from home. Kids are sharing the same home computers which is not ideal. Parents can not afford one. Some parents are barely keeping everything together for their families. We should be able to vote. Either send home ballots or everyone wear masks, wash hands and limited numbers at a time.
It is VERY important for people to vote for these changes in the budgets of our town.
